Citizens' record better on guns than officers'

I recently read a report in a Libertarian newsletter that contained some interesting informa-

According to a San Francisco report (which also appeared in the Wall Street Journal), citizens with guns do a better job of defending themselves, without hurting other persons, than do the police. In fact, 11 percent of police shootings involve innocent persons while only 2 percent of shootings by armed citizens involve innocent persons as victims.

In view of the fact that lawful defensive gun use by individual citizens each year is actually greater than gun misuse by felons, and in view of the fact that the Massachusetts University's Social and Demographis Research Institute estimates that 50,000 more violent crimes would occur each year if it weren't for the average criminal's fear of encountering armed citizens, isn't it strange that the Legislature is considering a bill to impose a waiting period on individual citizens who want to purchase a gun?

Why hasn't anyone suggested that we impose a waiting period on law enforcement officials who want to obtain guns?

'Sweepstake' could help solve revenue problems

I have a modest proposal by which the state could raise money to give health care for the poor without raising taxes.

The state could conduct a sweepstakes as a game of skill; each entrant would pay \$1 and try to guess the next public official to be arrested or indicted, and the offense involved. If a whole month went by without any, the state would keep the money; otherwise the pool would be divided by those who guessed the correct offender and offense. Likewise, if no one guessed right, the state would keep the money.

This would not only provide revenue to help the poor, but also would encourage higher standards of conduct among public officials.

JOHN T. HARLLEE

Trivial Pursuits

Jim Blanchard figures that only about \$75 billion of the \$700 billion in loans to underdeveloped countires will be recoverable, & govt. will print fiat money to bail out the international banks. (Gold Newsletter)

"There is no chance of any principal being repaid for a decade or more, " says Henry Kissinger. (Inv. Notebook)

may be decided by Latin America - maybe even whether you have a job or a secure income. The panic and crash of 1825 was triggered by British loans to South America that went sour. " - Julian Snyder, (International Moneyline)

Federal sting operation in NY City discovered no electric or sewer/water inspectors who turned down offers of bribes; On Principle suggests abolishing whole system, since no one is actually being inspected to protect the public, anyhow, and save the taxpayers \$50 million. (Also save at least that much more in bribes.)

TAX PROTEST DAY is upon us again.

Many libertarians object to being known as tax protesters. It has a radical connotation. It also suggests crackpots who hand out leaflets in the public streets. The government has been conducting a smear campaign against "illegal tax protesters", who are not people who protest illegal taxes, as it would seem, but those who call themselves "tax patriots", and affirm their patriotism by not paying taxes to support their country.

This is a matter of terminology. Refer to Tax Protestants, instead of tax protesters. Protestant is an ancient and honorable name for someone who is so disgusted with the state of affairs that he must protest. It was good enough for Martin Luther and John Calvin and the rest.

Declare proudly that you are a Tax Protestant. Even if you're Catholic, or Jewish, or Whatever

A POSSIBLE NUMISMATIC INVESTMENT ?

When I suggested investing or holding on to Confederate currency almost a decade ago, everyone thought I was joking. Maybe, and maybe not. In the 1970s, the Confederate dollar outperformed all other paper currencies, including the Swiss franc.

Now, there is no comparable Confederate coinage. There is one collectible coin, however, to look at: the Stone Mountain commemorative silver 🖟 dollar, issued in the 1930s. This is the mearest thing to a real Southern silver coin that exists.

Where else can you get a silver coin with "If history is any guide, your financial futures the images of the 3 men - Lee, Davis & Jackson who came closest to overthrowing the govt. of the US? - jh

Tax Credits for **Chastity Zealots**

The Reagan administration wants tax credits for private religious schools. They take some of the tax burden off those parents who want to send their kids to church schols-and add to the burden of the rest of us who are paying for public education. Do you have the some idea how it's being spent, below are excerpts from an article titled "Reviewing and Correcting Encyclopedias" appearing in something called the Christian School Builder (vol 15, no. 9, April 1983, pp. 205-07): "Encyclopedias are a vital part of

sneaky feeling that some of that money is

being wasted? You bet it is. To give you

many school libraries. They represent the philosophies of present-day humanists. This is obvious by the bold display of pictures that are used to illustrate paintings, art, and scuplture. This makes it important that the materials we place before our children are free from that which would inflame passion.

"In encyclopedias we are not battling a plot that captivates minds but are looking for erroneous information, sensual pictures, and unchaste details. One of the areas that needs correction is immodesty due to nakedness and posture. This can be corrected by drawing clothes on the figures or blotting out entire pictures with a magic marker. This needs to be done with care or the magic marker can be erased from the glossy paper used in printing encyclopedias. You can overcome this by taking a razor blade and lightly scraping the surface until it loses its glaze. After this is done the magic marker will not crase.

"As for evolution, cutting out the sections on the subject is practical if the portions removed are not thick enough to cause damage to the spine of the book as it is opened and closed in normal use. When the sections needing correction are too thick, paste the pages together being careful not to smear portions of the book not intended for correction."

(Kinston Whig-Standard/CF&T) If they knew the Bible as well as they should, they would know that anointing is for people (or animals) and that amointing money runs perilously close to the prohibition against graven images, since paper money is, in fact, engraved.

THE NEW MATH AND THE FREE SOCIETY

by Robert Brakeman

This is the story of a problem and its solution. First, the problem.

American public elementary and secondary schoolchildren are currently cursed, and the name of the curse is The New Math. Comedians have a field day with the subject, andthe jokes always involve some poor, confused parent trying to help a child with homework, only to be utterly baffled by the sets, and subsets, and bases, and the other methodological paraphenalia of the new math. The jokes are usually funny, but what's happening to our children isn't. After several years of experience with the new math system, no one doubts this conclusion: it's been a disaster. To be more precise, I should say that no disinterested observer doubts that. For there is a small by fanatical group which does doubt it: those who developed and instituted the new system and who therefore have a vested interest in denying that it's failed.

Aside from these interested parties who should be ignored, it's now conceded universally that American kids getting out of the 12th grade have an amazing inability to perform simple mathematical functions. Armed Forces induction tests and other standardized measuring tools confirm that they can't handle the elementary tasks of addition, subtraction, multiplication and division very well, that intermediate skills like the use of fractions are even harder for them, and when it comes to advanced subjects like algebra, forget it. Naturally I am referring to the average or median student; obviously there are some superior pupils who can master any system, no matter how foolish, inappropriate and incomprehensible it may be for most learners. No system of mass schooling can be sensibly built upon a foundation which addresses itself to the needs and performance of only the brightest; a mass-education tool, like the New Math, which has failed for most students, has failed, period.

How did it happen that this New Math Curse was inflicted upon America's 5-through-18-year-olds? As with most demented public policies, it began with some "thinkers" who had a brilliant idea which turned out to be not-so-brilliant, but who had enough power and influence to get the "authorities" to adopt their plans, and coercively (through the public school systemand its compulsory attendance laws) force them upon the minds of innocent people (in this case, children). To make a long and depressing story short, this is what happened:

In the early 1950s, some academicians decided that the mathematics curriculum in American schools needed "reform". Naturally, they didn't stop with that statement; to the surprise of absolutely no one, they also had a plan on how the reform should be carried out. The paln, the "modest proposal", was that the focus in mathematics—education was to be shifted in these ways:

Where, previously, students had been taught simply that 2 + 2 = 4, they were now to be taught why it equals 4, and why it came to pass that it always has and always will equal 4.

Where, in the past, students spent much of their time on "mere" memorization, on rote learning, in this brave new world they would begin to solve problems using deductive logic instead of mere recall.

Tools, like the multiplication table, which "merely" allowed the student to solve the problem at hand would be replaced by tools, like sets and subsets and inverses and bases, which allowed him to both solve the problem and understand why the solution was what it was.

Where in the dark ole days students learned only methodology, how to get things done, they would now, during the new enlightened era, learn how to get them done and why they are done in a particular way (theory).

And where, in the benighted past, kids would think of 2 + 2 equalling 4 only as an abstraction, in the future they would actually get to see the glories of the addition of "sets", by taking 2 actual sticks and combinging them with 2 other actual sticks, and seeing that there were then 4 sticks.

For people trained to think in the highly abstract and often illogical ways which prevail in some parts of academia, all of this sounded splendid. And since the school administrators who are responsible for defining curricula and choosing text-books tend to admire and take their cue from university intellectuals, school officials all over the nation, through the late 50s and early 60s, began switching to the new system. And since parents are coerced into supporting the public schools and usually can't afford to pay a second time to send their children to private (which is to say, better) ones, a captive, slave audience of 90+% of American children were forced to learn the new system. This spread of the new math was a joyful development for its originators, individuals like Professors Edward Begle of Stanford and Max Beberman of Illinois, and groups like the School Mathematics Study Group, headed by Begle, the U. of IL Committe on School Mathematics, Beberman's forum, and the Cambridge Conference on School Mathematics; but joy was not exactly the reaction of students and parents. Frustration was, and, for the students, failure,

How did the developers of the New Math err? They misread two things: how much schoolchildren could learn and how much they needed to learn. The detailed theory of the new system has proven to be much too complex for most kids, and the predictable result has been confusion, frustration, and failure. And the great tragedy is this: there is no reason the children should learn the theory. The logical flaw in the pro-new-math arguments is the suggestion that learners are better able to perform and understand the mathematical functions if they know the theory which underlies those functions, if they know the why of things as well as the how. That suggestion is nonsense; a child who has memorized the multiplication tables is as well equipped to multiply as one who knows all there is to know about math theory. There is no logical reason that a theoretical understanding should add to a student's ability to perform mathfunctions, and the New Mathers had failed as soon as they assumed otherwise. Theory and mechanics are separate subjects and skills; math professors and theoreticians need both - elementary and secondary students don't.

So that's the problem, the New Math. Solution is the Free Society (as it is the solution for so

There is only one Education, and it has only one goal: the freedom of the mind. - Richard Mitchell. THE LEANING TOWER OF BABEL.

THE NEW MATH, continued

many natural and man-created problems). The reason that as illogical an idea as the New Math was able to permeate the entire nation so quickly was that we had public (coercive) schools. For all the million+ students of, say, New York City to have the system forced upon them, just one decision had to be made by one central administration - a decision from which there was no appeal. That decision stuck for almost all kids, since private schools weren't an affordable possibility for them. If, instead, there had been, say, 2000 private schools in New York and no public system, it would have taken 2000 decisions to force all the kids into the new math system, and many of those decisions, undoubtedly, would have gone the other way, and so on around the U. S. Some schools would have tried the system, and when its unworkability had been proven, other schools, which had chosen to wait-and-see, would have never made the mistake. Parents who opposed the new math could have switched their kids from one school to another to avoid it. As things are now, in our unfree, coercive society. they're forced to try to overthrow whole school boards and remove deluded administrators. A system of free (non-public) schools makes opposing tendencies easy - you go elsewhere. A coercive, monopolistic system makes it very hard - you have to become a politician and a lobbyist and undertake a years-long political and educational campaign. A free society would have limited the spread of the delusions of the new math in the first place (and therefore limited the destruction of young minds), and it would have made the elimination of the penetration it did achieve incomparably easier. If a free society only achieved this damage-limitation, that's recommendation enough for it.

In one of the most bizarre political fund-raising efforts in recent memory, the Republicans have launched their own publishers clearinghouse-style sweepstakes. Entry forms have gone out to more than a million households, informing recipients "you may already be a winner" of \$50,000 cash, a new car, a vacation trip or a custom-built home. Entrants are asked to send in \$15 to \$100 to the National Republican Congressional Committee, but the contributions are mandatory. The committee calls it a "marketing tool" designed to make money and provide a computer list of contributors for future fund-raising.

-D.C. Gazette

LABOR'S JOKE BOOK, by Paul Buhle, WD Press, Box 24115, St. Louis, MO 63130 has to be the least funny joke book ever. It has a lot of hate, but hate is not funny. It has some shrewd observations, but "a union without struggle is like a ship without sails" is not funny. It's not even up-to-date. Variations on "Waiter, there's a fly in my soup", even if they were funny, have little to do with the subject. Conclusion: organized habor is no laughing matter.

QUALITY OF EDUCATION? MAYBE!

A "quality index" of 6 categories rated the Wyoming schools first, followed by Alaska, Montana, Vermont & Rhode Island. Texas, Kentucky, Tennessee, Indiana & Georgia came in last.

The categories are college admission test scores, dropout rates, pupil-teacher-ratios, per-pupil expenditures, teachers' salaries & percentage of percapita income spent on education.

Note carefully that, except for the first, none have any relation to whether or what the school inmates are learning. College admission test scores favor states which have the fewest students taking college admission tests, and thus can be misleading. Dropout rates prove nothing. Pupil—teacher—ratios are lowest in sparsely populated areas, and so this would favor states with low population density; this shows up in the first 3 states on the list. The same factor causes a higher cost of operating schools so that the last category is largely a repetition. So for that matter is the 4th, per—pupil expenditures; the fewer pupils per class, the higher the cost for each.

Essentially, the measure of "quality" is the small school mandated by low population density, maiking transportation unduly expensive. Incidentally what runs costs up in such areas is the non-educational costs, such as transportation.

Likewise, teachers' salaries have no known correlation with pupils' achievement.

What we have here is, essentially, not a quality index at all.

Let's help create construc-

all about, find entrepreneurs who

much for justice

SEVEN years ago a middle-aged black couple were savagely beaten up by police who invaded their house without a search warrant.

Two years ago the couple were awarded £51,000 damages in the High Court for what Mr. Justice Mars-Jones called "a catalogue of violence and inhuman treatment,"

He accused the police of a "five-year cover-up" and said they had brought assault charges against the couple in order to hide their own brutality.

"That was," he said, " a monstrously wicked thing to do."

After the High Court hearing, Scotland Yard sent the papers in the case to the Director of Public Prosecutions. But he decided not to act because of the time which had elapsed since the couple were assaulted.

Secret

The reason, of course, so much time had elapsed was because of the police's cover-up. So Scotland Yard conducted an internal inquiry, followed by a disciplinary hearing chaired by an assistant commissioner.

One policeman who admitted "unnecessary violence" was fined. Three others were found not guilty.

Once again, the police judged the police. The inquiry was secret. So was the disciplinary hearing. So were the names of the policemen. So was the amount of the fine.

Scotland Yard has now sent its "sincere suffered multiple injuries.

they have lists

WASHINGTON, DC -- The U.S. Customs Service is developing computerized "target lists" of thousands of individuals who repeatedly receive pornographic material from foreign countries, according to USA Today. The lists will be offered to local law enforcement agencies "to provide leads in child sexual abuse cases," according to Customs Commissoner William von Raab.

"We have been quite surprised at the occasional coincidences that recipients of large volumes and frequent shipments of child pornography often live across from public playgrounds or are on the staffs of child daycare centers and that sort of thing," said von

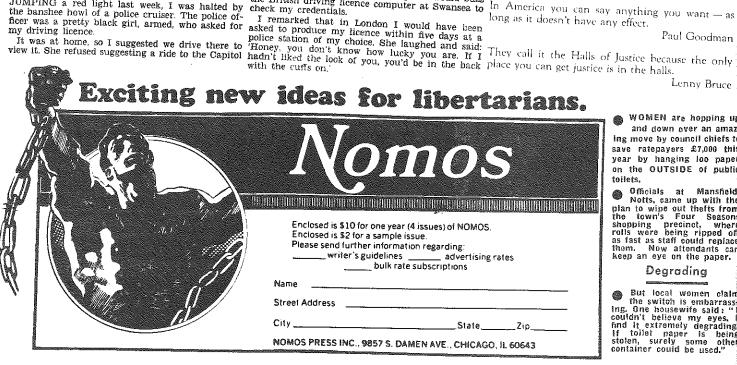

The American Civil Liberties Union, however, takes a dim view of Customs' lists of pornography buffs. Burt Neuborne, legal director of the ACLU in New York, said the listkeeping is "flatly unconstitutional." Neuborne added, "The most dangerous thing any society can do is keep a list of who reads what.

Included on the list will be persons convicted of "sex offenses" as well as repeat recipients of pornography - some of whom have been convicted of receiving pornographic materials, but others who have never been charged with a crime.

The names of more than 2000 people who have received foreign shipments of pornography through the Chicago mail depot have already been entered into the Customs Service computers, while New York customs officials have about 4000 names to add.

Informal federal-local task forces that would make use of the information have been set up in New York and Denver, with another being planned for Seat-

Norman H. Crowhurst

You've seën the bumper sticker: "Fight Crime: Abolish the IRS." While government must have revenue, that slogan ought to make people think, but we doubt it. We recently attended a "Combatting Crime" seminar, conducted by a panel consisting of a legislator, state police, the media, a man from corrections, and victims' rights and compensation agencies.

What they said overlapped a lot, but the real cause escaped mention. They were all complaining that budget cut-backs would highway patrolmen, who cost the taxpayer an average of average of \$22,000/yr, in ticket

Store boss's rough justice

By SUN REPORTER

MILLIONAIRE stores boss Mike Robertson is planning of rough justice for shoplifters—by putting them in the Z stocks.

Their names will be chalked up on blackboards and the goods

they stole will be on display.

The shock treatment is Mr Robertson's way

of getting back at the thieves he reckons cost him £2,500-a-week. Shoplitters caught by detectives at his Trago Mills superstore chain in Devon and Cornwall will be given a stack chairs. UBERTARIAN PARTI

But Scotland Yard ad- be given a stark choice: mitted last night: "Sorry, ing to be put in the grateful to The Sun for over to the police. bringing it to our attention."

To sign a form agree-ing to be put in the stocks. OR be handed over to the police.

Mr Robertson, ht, estimates it will cost how.

mates it will cost han \$500 to set up the stocks in the car park of his

But he believes it will be money well spent

Mr Robertson, who isalso offering his staff re-wards for catching theves said yesterday "I had to take the law into my own hands.

"Police can't cope, and fines in the court are derisory — one person who boasted of stealing £10,000 from me was fined just £100.

Shoplifters who agree to the deliberate humilia-tion will spend between one and four hours in the stocks, depending on the value of the goods they steal.

A legal adviser said: "If the thieves volunteer appropriate sign an appropriate waiver, they wil not have any grounds to sue

THREE boys alleged to have sexually assaulted a nineyear-old girl at knifepoint have been let off with a police caution.

Now the girl's angry mother has asked her MP to investigate the "horrifying" decision not to prosecute.

"A caution means nothing to these lads," said the 28-year-old mother, who lives

in Blackburn, Lanes.
"What might they get up to in the future if they think they can get away with terrifying things like this?

"My daughter is afraid to go out while these lads who could have ruined her life are free."

Garage owner Martin,

of Harrow, Middx, said yesterday: "It's ridiculous, I'll fight it in the highest coult in the land."

He claims the imported

car is a toy, but a Scot-land Yard spokesman said its driver CAN be

prosecuted under Road Traffic Act,

no lights, brakes, speedo or road tax—and Martin wasn't wearing a seat

Stripped

The girl and her 10 year-old brother were playing on a rubbish tip near their home when a 13-year-old boy and two 11-year-olds approached them.

The mother claims the boys — who had a knife — threatened to stab the girl's brother unless she agreed to have sex with the 13 - year - old.

She was then stripped nuted and assaulted

BY SUN REPORTER

A JUDGE who caused a death crash after drinking wine at a wedding was "completely satisfied" he was fit to drive, a court heard yesterday.

Sir Henry Skinner, QC, a Justice of the High Court, took a bend too fast and bit an oncoming car head-on.

He was fined £300 for careless driving-and after the case the victim's son lashed out at the "leniency" of the penalty.

Sir Henry, who did not appear in court, admitted careless driving.

Why do people sink whaling ships, release dolphins, boycott veal...?

Haven't you ever wondered whether we really need to exploit animals and nature the way we do?

A movement is being built to challenge these forms of exploitation and the cultural attitudes that go with them. Nature alienation wounds our society; the healing requires political action.

Read about it in AGENDA, the independent, bi-monthly newsmagazine of the rapidly growing animal rights/liberation movement.

AGENDA'S 25 contributing editors keep you in touch with the action for improved relations with the rest of the planet.
