In 2007, Ron Paul created the money bomb and raised over \$4 MILLION in 24 hours. He was one of the first to successfully meet an online fundraising goal.

And I want to do it again!

I set a money bomb fundraising goal of \$20,000 before January 31 at midnight. (My birthday is January 29th, so please send me a birthday gift.)

I'm continuing Ron Paul's fight against the global imperialists that are driving us closer and closer toward bankruptcy, endless wars, and the total destruction of our society and culture.

I'm inviting you to make a vital contribution to our presidential campaign with a gift of \$100, \$50, \$35, or even just \$10 today. **Click here** to help me reach my goal.

DONATE

Under globalism, the regime does not operate strictly to serve national interests. It aims to erase national borders, nullify the Constitution, and deny the rights of national citizens. Globalists want to control consumption, reduce living standards, overwrite the culture, and even reduce the population.

Globalism dissolves any local or national community to intensify the state's control and extension over more and more of the population.

Yet an emergent political force is taking shape: localism.

This movement seeks to resist the demands of the federal-state globalists and to nullify their encroachments on the self-determination of citizens.

This is how you and I can RecTheRegime!

That's why my campaign is focused on recruiting more members to the party, supporting other LP candidates, spreading our message to voters, and achieving historic results.

If you want to RecTheRegime with me, then please send an urgent donation to my Presidential campaign today.
