

Senior Citizen,
Veteran,
Horseman,
Small
Businessman,
Merchant
Seaman, and
most dear to
my heart,
a fellow
New Yorker.

Hi;

I am Jack Diodato, and I
want to represent you, my fellow
New Yorkers as your next
Governor.

An open letter to all my fellow New Yorkers.

I am interested in a run for the Office of Governor of the great State of New York. It is at this time in our political history that the Governors office is ripe for the taking. You can't find a Republican who cares about all of us New Yorker's. As a matter of fact, you can't find a Democrat who wants to help anyone except for their own party. I am a New Yorker born in Brooklyn, raised in the Bronx and have lived all over the state of New York. Currently residing in Orange County, New York.

I understand the problems of my fellow New Yorker's. And more importantly, have the answers. With that I'd just like to say; the problems are small and simple, and the answers to the problems are equally small and simple.

Politically, I've been an "Independent" all my voting life. I registered as a Republican for the sole purpose of supporting Ron Paul for President. Of course we all know how that turned out. That's how the Republican Party treated its' best option to win the highest office in the land. You can just imagine how low on their priority list we New Yorker's are. As I pondered where my political alliances would go from there, I gave it serious thought. And almost immediately came to realize that for as far back as I can remember, the only candidates that ever earned my vote without hesitation, was a "Libertarian Candidate". The Libertarian Party has shown absolute consistency when it comes to the Rights of the People. And with their help and blessing, we will cultivate an alliance of integrity to go after and gain the highest office in the State of New York.

As I've said before, I am a New Yorker! And as a New Yorker I will further the agendas of every party in our state. That's right. Liberals, Socialists, Democrats of the Right as well as the Left. But, all Republicans from the Right and Left also. And as a leader in the Governors Office I will show all my fellow New Yorkers they can have everything they need by simply embracing the Conservative ideals that all parties need to, not just survive but, flourish.

I know this is hard for many people to accept. But, think about it. You, my fellow New Yorkers have been voting for your party's agenda for not just years, but decades. Not once has your party, regardless of which party, ever brought your personal needs and agenda forward one iota. Those days are over in one election.

My first priority for my administration is to STOP taking away from you what is legally and rightfully yours. Secondly, which in my opinion is just as important, *return* the "Right of the People to Referendum". With this "Right" returned, '*we the people*' will no longer have our lives held hostage again. EVER!

And just as *immediate* "Recall all New York State Militia!"

Go to my website for complete details of all the issues discussed here.

List of Issues I Plan on Addressing...*Immediately!*

- 1) Stop taking away from my fellow New Yorkers what is Legally and Rightfully ours.
- 2) Return the "Right of the People to Referendum".
- 3) Recall all New York State Militia.
- 4) End the Prohibition of simple, safe, non-addictive medicinal herbs.
- 5) Energy from New York State.
- 6) Gambling.
- 7) Education.
- 8) Health Care.
- 9) Business.
- 10) Employment.
- 11) Women's Rights.
- 12) Same Sex Marriage Rights.
- 13) Consumer's Rights.

Stop taking away from my fellow New Yorkers what is Legally & Rightfully ours!

What I mean by this is simple. Once I am in office I will stop anything going forward. How? Abolish the Empire State Development Corporation.

There has been too much political bullying going on and that stops immediately. There is no higher authority in New York State, than the resident/taxpayer. If a New Yorker says "NO". Then it's "NO". No longer will the federal and/or state government tell New Yorkers how to live on their own land. Protecting the environment will be the responsibility of the landowner, and we New Yorker's!

Return the Right of the People to Referendum!

I don't know how many people who woke up to what I woke up to one sunny morning. As the alarm clock is always set to the morning news with traffic and weather reports to start my day, I listened to the voice of the DJ announce that "during the night while we all slept another one of our rights were taken away from us". He continued with disgust how the "Albany Mafia" took away our right, the "Right of the People to Referendum". Absolutely disgraceful! That single Right will be a top priority. As you can see by my short list, there are many equally important issues to attend to. Preferably all at the same time.

Recall ALL New York State Militia!

According to two U.S. Presidents (Bush & Obama), the Wars in Iraq and Afghanistan are over. Right now our young boys and girls are being left in harms way as if they are expendable. Bullshit! This is tantamount to SLAVERY. And unacceptable to '*we the people*' here in New York State.

I can't believe how loud people have been yelling about a minimum wage for the newest additions to our work force to earn a minimum wage of 10 to 15 dollars an hour to flip hamburgers. Our young boys and girls are currently making LESS than minimum wage on the battlefield. I don't hear a single one of them yelling to recall these innocent boys and girls who are being used like they are mere slaves. I believe this alone will garner attention from every State in the Union. And set precedence for all 50 states to follow. Once again putting New York State in a leadership position.

End the Prohibition of Simple, Safe, Non-addictive Medicinal Herbs!

How many times have we heard a politician running for the Governors Office as well as every other office, promise to end the prohibition which has just about reduced our working class to that of slaves and mere criminals? Then when they are voted in, all we hear are excuses why they won't. The government has NO LEGAL Authority to outlaw any simple, safe, non-addictive medicinal herb. All they had to do was wave their hand in a God like manner to end this ridiculousness and yet they refused. Why? Simple. They want to hang over our heads what got them elected to get them RE-elected. Let's stop that nonsense immediately!

Let me mention a couple of things as long as I'm here on the subject. The last "Farm Bill" that was voted in had "Commercial Hemp" snuck into it. And passed. At least that's what they want us to think. They just made it legal for people to discuss the matter further without legal ramifications. The Hemp industry has been around for thousands of years. We don't need to discuss it any further. 10 to 50 thousand products have been made from the hemp plant throughout the entire history of our planet. We get paper, cloth, oil, wood, and natural medicines just to name a few.

Where are all the Environmentalists? Millions of acres of prime forest burns to the ground costing hundreds of millions of dollars and way too many lives, every year. Why is industrial hemp illegal? Decades ago the lumber industry and the paper industries got together and paid our politicians for it to be illegal so they can control the price of and availability of paper and lumber.

And then there's the "Ginseng" root. Another simple, safe, non-addictive medicinal herb. Before it was legal the DEA would march right pass your pot plants to get to the ginseng plants. That's how dangerous this herb was to our society. Now that it's legal, we grow the best "Ginseng Root" in the world right here in Dutchess County, New York. Where the two users in the world, China & Korea who use the most, import from. Imagine the revenue from Hemp.

Oh, by the way, you know that deadly "staph infection" you pick up from hospitals when you stick around long enough, it can't live on the hemp scrubs. Yet thrives on the synthetic materials used now.

Energy from New York State!

In case you don't know it by now, New York State is the Saudi Arabia of the west. Abundant in energy in all its forms. Oil, Natural Gas, and yes, even Coal can be mined from our very ground, just to name a few. How does that help New Yorkers? Easy. We Americans have a unique position in our own country. Everything below ground, on the ground and even a certain height above ground, is all ours. "We the people" own ALL our natural resources. Instead of paying some corporation to take it out of our ground and sell it back to us at a huge profit, every resident of New York State will benefit from all these resources. It's called "Residuals". We New Yorkers should get, BY LAW, a piece of all the action. Not just some. Why aren't we getting it now? Because Albany is stealing it from us. Are you paying a company to supply you with electricity and natural gas? Then you are being robbed. Let me give you a quick example; I was going over my Energy Bill and found many taxes. Most, if not all, are duplicative. I found a tax that no one in the corporation knew of and could not explain. They referred me to the New York State Commission on Energy (tax maybe?). I'm not quite sure of the exact office. It is the office you refer to when you feel you are being unfairly taxed(?). They also did NOT know what this tax was. Not too long after I hung up the phone from speaking to this Commissioner's office, I received a phone call from them assuring me that they do not know what this tax is for, but that everyone was paying it. Wow! Imagine you and I feeling better about being ripped off just because everyone is being ripped off. That nonsense ends. Even though there are many people against "Fracking", the good news is they all do not live in New York State. I will win over the ones that do. Remember, California has been Fracking for 60 years.

Gambling...

Is already LEGAL in New York State! We the people are the only ones not allowed to enjoy or profit from it. We have how many different Lottery's? How many different companies supply the equipment? How much of every dollar goes to the state, we the people? Hundreds of Millions, if not Billions, of dollars that should be going to our schools, should be FREE tuition all around. Imagine every County having their own Lottery. Or each school having their own Bingo Hall. Most School Taxes are 3 times the amount of the Real Estate Tax. Imagine getting rid of the school tax completely. Imagine Niagara Falls with Hotels and Casinos inviting all New Yorkers to vacation and honeymoon in our home state. And all those jobs! Why should all the Indian tribes get all the TAX FREE dollars? After all, the previous Governor, David Paterson, gave a tribe the real estate which by law can only be used for an Indian Casino. How about the local and occasional poker tournament? And why should the hard working taxpayer be deprived of a poker night out with our friends?

Education.

We all know how expensive college tuition is. And yet we give millions in our tax dollars to schools that don't need it. We should not be giving our college's huge amounts of money just to charge young people an exorbitant amount of money for tuition.

And then whore them out to the credit card companies. The funding will be moved to the lower grades to fortify the younger minds. And how about our college's having their own credit cards with a small percentage rate that goes directly to the college? Simple enough.

But, I'm a New Yorker and I know we can do better. Remember those localized lotteries, bingo halls, and casino's? Not to mention the residuals from energy profits. I believe using the residuals from gambling, when calculated upon, may pay the tuition for all students to go to private schools and save the taxpayers even more. What an incentive to move to New York and raise a family.

Health Care.

First of all, health care has to be defined. Most people think its health insurance. Health care should be a choice of diet, hard work and lifestyle. Clean food, clean water, clean air. Medical centers that are affordable and modestly priced. Knowing all fees for services up front. Knowing the price up front will allow the patient to shop for a more competitive price for those services. This will not only help the patient know the cost. But,

also the insurance company covering the patient will have a better chance of keeping costs low. As for these insurance companies go, I understand there are maybe 4 or 5 health insurance companies in the whole 50 states. I think New York is big enough to have 4 or 5 companies of her own. Good honest competition will keep prices down. In short, deregulate the healthcare industry.

Business.

Very simple. Allow an atmosphere of commerce to exist. Right now, Albany is stifling any business growth. And squeezing existing businesses into bankruptcy. I believe a flat business tax of 10% is quite sufficient. I don't have to tell you about the record breaking profits companies are having and complaining about their high tax rates, yet pay no tax at all because they have all the tax write offs. I'd rather have 10% of something, than 50% of nothing. Too much regulation comes from too much bureaucracy. By getting rid of the sales taxes that follow a product through all the stages(Value Added Tax) of its' manufacture will make things affordable. To buy as well as create, here in New York State.

Employment.

As you can see so far, there will be plenty of jobs to go around. This will help to stabilize unemployment insurance costs. On that subject, I believe the basic unemployment insurance for a worker can be supplemented by the worker. And as for Worker's Compensation, it's gone. The only way to protect a worker is to allow a bureaucratic free solution.

Women's Rights.

Simple enough. What do you need? What do you want? You already have Rights. Albany is just discriminating against women. That's over.

Same Sex Marriage Rights.

If you are an American, you already have them. They are the same as heterosexual rights. Albany, and even Wash., D.C. for that matter, are blatantly discriminating against any and everyone for their sexual orientation. It's none of the governments business what goes on behind closed doors between adult American citizens. By simply comparing a heterosexual citizens rights to a gay citizens needs, you can accomplish everything.

Let's see if I can use a hetero scenario to explain; During the 1960's and 70's it was common to hear stories of survival by senior citizens of the same gender becoming married and combining their meager social security checks into one marriage of resources to afford to live together and share a can of dog food. Frances became Frank. Mike became Michelle. And so forth. It was these stories that got Social Security it's much needed raise of payouts. What also came out of the times was the bachelor pad. Two single guys, or gals for that matter shared real estate and even put each other on their insurance for their cars or real estate or bank accounts and whatever else they wanted. All of a sudden the government gets involved and citizens are being discriminated against for their sexual preferences and these rights taken away. Not that they had any right to. It just takes leadership to set an example of minding your own business and giving the citizen what they need, privacy.

Consumer's Rights.

I don't know what everyone imagines we have as rights as consumers. But, we have a hell of a lot more than you think. After all, we consumers are also citizens. And any information about you and your business dealings will be forbidden. Unless you the consumer/citizen want it otherwise. In New York State, the citizen/consumer has more rights than any corporation or government agency.

According to the Constitution, the Personal Income, Marriage, Inheritance taxes are all unconstitutional. "...secure the Blessings of Liberty to ourselves and our Posterity..." I will define the American way of life.
