I feel our government has runaway with its own ideas as to how the people of NJ should live. By electing me as your senator, I will represent you in making government smaller yet more efficient. We must work together and get this "Regulatory Reform" program underway. The people of NJ should live as they see fit without government intrusion. With this; I ask for your help by contributing to:

Our current representatives are not expressing our views. We can plainly see that. We need to create a vehicle for which our voices are heard. The interaction between the people of New Jersey and that of its government must work as one.

The legislation I plan to propose mainly addresses the topic of Government Accountability. We must put our relationship with our "Public Servants" into perspective. They need to be performance tested, as well as their departments need to be investigated. This investigation can and must be done by an outside agency, an agency not affiliated with the Attorney General's Office. This agency must be created by revolving volunteers. These volunteers must be taxpayers like ourselves. Let us work together and keep our servant's noses clean.

District 30 is a Centralized Point in NJ, thus having the potential for setting an example for the rest of the state both north and south. Let's take it upon ourselves and make the necessary changes to utilize THE POWER OF THE PEOPLE to make the difference in Trenton. This is the key to my whole campaign. I will not be quiet. I will not be quieted. I will not quit. I am energetic in all that I do and will promise to produce the results we need to make NJ more comfortable for our children our seniors not to mention the hard working taxpayers like ourselves.
